

**NEW
PRODUCT!**

INTRODUCING THE REVOLUTIONARY MIGHTY-MIGHT AUTO-PNEUMATIC AP-1

AIR POWERED FLUX RECOVERY SYSTEM

SYSTEM SHOWN IS
AP-1 MOUNTED ON
LINCOLN AUTOMATIC
WELDING HEAD.

FHM-1 HOSE
BRACKET
(OPTIONAL)

**INEXPENSIVE, RUGGED, AND POWERFUL;
THE AP-1 MOUNTS EASILY ONTO MOST
AUTOMATIC SUBMERGED ARC WELDING
EQUIPMENT.**

IMPORTANT FEATURES:

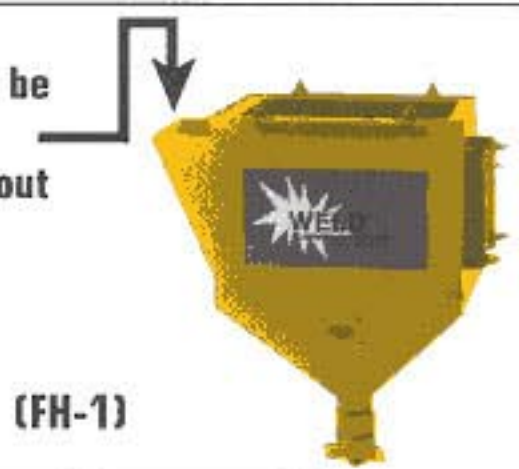

- **Adds no oil or water to the flux** and produces no damage to the recovered flux particles, since flux is never in compressed air stream.
- **Vacuum air pump is on exhaust side** and undesirable contaminants, fines and dust are discharged into a very efficient dust bag assembly.
- **No moving parts** in air pump, and **no internal filters to wear out.**
- Very efficient air pump produces a higher vacuum, uses less air, and is quieter than most competitive models.

SPECIFICATIONS:

- Weight (empty): 23 lbs.
- Dimensions: 19"H x 10"W x 8"D
- Power Input: compressed air @ 70-100psi, approximately 10 cfm (1/4" I.D. air line minimum). No electrical input required.
- Comes complete with 5 ft. hose, nozzle, mounting brackets and hopper sight glass . . . ready for installation!

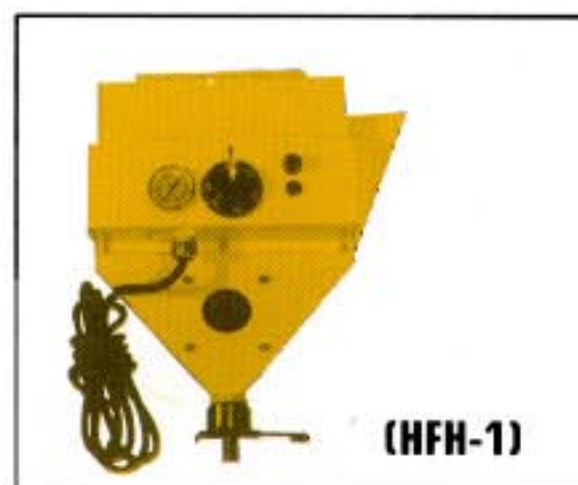

OPTIONAL ACCESSORIES:

New flux can be added here anytime without interrupting the weld.

(FH-1)

- "Continuous Feed" Flux Hopper (FH-1) holds approximately 35 lbs. of flux. New flux is added thru flux port without interrupting weld; enabling indefinite weld length. AP-1 mounts directly to this hopper.
- Flux-Hose Mounting Bracket (FHM-1 or FHM-1 ADJ) provides easy positioning of vacuum hose over flux to be recovered.
- Adapter Plate for mounting to miller hopper (MADP-1).
- AV-4 Electric Air Valve.

(HFH-1)

- Heated Flux-Hopper (HFH-1) with thermostatic control and temperature gauge. For those applications where flux must be heated. (115v or 220v).
- Nozzles: Special nozzles available. Consult factory.
- Extra hose.
- FP-1 Flux Port (enables adding new flux without interrupting weld).
- MAGSEP-1 Magnetic Separator.
- AFV-2 Automatic Flux Valve and Control.
