

WELD

ENGINEERING CO., INC.

The MIGHTY- MIGHT **ALT-2** Submerged Arc Flux Recovery System (PATENTED)

for WELDING TRACTORS and other applications where size and weight are important factors.

ALT-2 mounted on Welding Tractor

Features:

- Mounts directly to most submerged arc welding tractors.
- Ultra-lightweight aluminum construction.
- Modular two piece design enables perfect balance and minimizes weight on Flux Hopper.
- Powerful electric vacuum can meet your high flux recovery demand.
- Revolutionary (patented) self-cleaning dust and fines filter enables hours of uninterrupted operation.
- Flashing light tells operator when to clean dust bag for maximum efficiency.
- Direct recycling of flux back to hopper.
- Fused slag is automatically separated from flux.
- New flux can be easily added without interrupting the weld, enabling indefinite weld length.

(See figure on back of page).

Advantages:

- Saves time and money by eliminating the extra job of recovering flux.
- Recovers all unfused flux.
- Introduces no oil or water into flux
- Easy to install and operate.
- Fits almost any flux recovery application where weight and space are an important factor.
